

MS Printing Solutions, founded in 1983 in Italy, is a market leader in the design, development and distribution of innovative digital ink-jet printing systems and associated consumables serving the high-end, roll-to-roll textile printing and specialty material markets. Since 2014 the company is part of Dover Corporation.

The MS knowledge and experience allows us to innovate products into the demanding and everchanging market of digital textile printing. Our modern technologies allow us to improve any aspect of textile printing, starting from the performance up including the important environmental issues.

Our scanning and single pass printing machines can print both on paper and fabric.

All MS printing machines have open ink system, open software system which provides our customers all the freedom they need.
