About CEPSI

Held once every two years, CEPSI is the AESIEAP's flagship event where the most prominent electricity supply industry players from East Asia and the Western Pacific region converge, over 5000 participants will gather under one roof to discuss & to share their experience among policy makers, industry leaders, stakeholders in the electricity supply industry.

CEPSI2023 will include exhibition, conference, panel discussions, technical paper presentation, round table discussions and networking. All these will serve as a platform for industry players to meet with both international and local industry experts for technological exchanges and cooperation for the pursuit of better industry development.

In November 2021, Xin Bao-an, the President of CEC (China Electricity Council) and Executive Chairman of SGCC, officially took over as the Chairman of the AESIEAP 2022-2023. In the meantime, CEC, together with other major power utilities in China, will host the AESIEAP events 2022-2023.

Why to Exhibit?

- CEPSI 2023 China is jointly organized by the China Electricity Council and the State Grid Corp. of China, with extensive support and participation of all the major power grids corps and power corps in China.
- Major industry leaders, related Government officials as well as the power utilities leaders from both domestic & overseas, will gather under one roof, where you can get the latest market trends and have better understanding of the Government policies in different countries/ regions in Asia Pacific regions.
- Over 5000 industry players (from 22 countries/ regions) will gather together to attend the conference and discussions, it provides a very good platform to meet each other for technological exchanges, experience sharing and business discussions.
- CEPSI is a highly internationalized expo, with international exhibitors, speakers, attendees and extensive media exposure.

Scope of Exhibits:

- Advanced thermal power generating units and auxiliary equipment
- Hydroelectric generating sets and related equipment
- Nuclear power plant technology and equipment
- Photovoltaic, solar thermal and wind power generation technology and equipment
- Energy storage, hydrogen energy and fuel cell technology and equipment
- Integrated smart energy technology and equipment
- Renewable energy power generation and other new power generation technologies and equipment
- Ultra high voltage power transmission and transformation technology and equipment
- Construction and transformation of urban and rural power grids and power supply technology and equipment
- Power dispatching and communication technology and equipment
- Electric power environmental protection technology and equipment
- Distributed generation equipment and networking operation technology
- Electric power measuring/ testing instrument equipment & technology

About AESIEAP

Founded in 1975, the Association of the Electricity Supply Industry of East Asia and Western Pacific (AESIEAP) was the most influential international non-governmental organization in the power industry in the East Asia and Western Pacific region. At present, the members of AESIEAP comprised of more than 70 organizations from 22 countries and regions.

The mission of the AESIEAP is to promote the cooperation among the members for solutions to solve the problems of the electric power industry in the region.

After decades of development, the AESIEAP events have become the most influential one in the electric power industry in the Asia Pacific regions. Among them, the two most important events are the AESIEAP CEO Conference and the CEP SI, which would be held in alternative years.

Booth Rental

Package Stand : USD5500/9sqm booth ;

Raw Space : USD550/sqm ; Min. 36sqm

2023 Show Figures (Estimate):

Exhibition Scale: 20,000sqm

Conference attendees: 5,000+

CEPSI 2018 Sponsors (Partial):

(In no particular order)
