Why to visit EP Shanghai 2023

Annual Feast of the Industry

1

EP Shanghai 2023 _The Largest and the leading Electric Power & Electrical Expo in China

Total exhibition scale expanding to **5 Halls**, well attended by over 1,300 exhibitors/brands from worldwide, with over 60,000 sqm of exhibition space

"Smart Energy" & "New Energy Storage" Zone Evolves with Innovative Solutions

Spotlight on Energy Storage and Smart Energy Booming Markets, covers various aspects of the energy and power industry, including **smart grids, new energy, solar energy storage, micro-grids, and 5G**, to facilitate the Power Industry's Digital Transformation and Intelligent Evolution.

2

Most comprehensive - 5 Specialized Exhibits Zones Cover the Entire Industrial Chain

- One-Stop Power Transmission & Distribution
- Energy Digitalization
- Electric Power Automation
- Integrated Energy
- Intelligent Manufacturing

3

ABB, Schneider, Siemens, and more leading brands confirmed participation

Over 1,300 renowned brands from worldwide will showcase their latest technology and solutions. Exhibitors including Schneider, Acrel, Changyuan, will be attending the "New Products Gallery" for their new products release.

◆ New Product Gallery

The new product launch covered smart grid/power IoT applications, intelligent power monitoring, and integrated energy solutions.

The participating companies include:

1. Schneider Electric
2. Changyuan Technology Group Ltd.
3. Acrel Co., Ltd
4. People Electric Co., Ltd
5. CET Electric Technology Inc
6. Yantai Fisend Bimetal Co., Ltd
7. Yijiahe Technology Co., Ltd.
8. Xian Xd Switchgear Electric Co., Ltd.

Major Renowned Exhibitors in EP Shanghai 2023

US Pavilion、German Pavilion、Trade Association

Established in 1986, EP is organized by the China Electricity Council and State Grid Corporation of China

Provided the high-quality business platform for "Business Matching"

Enriched the network resources of suppliers

Customized service with no charge

Created unlimited business opportunities through fast, convenient and accurate matchmaking before, during and after the exhibition

Scan Code To Business Matching

EP Online Platform

Online Overview New Products, Electric Power Equipment, and Technology Interconnected in Anywhere and Anytime

Receive the updated show information, products and exhibitors list

Pre-registration for the concurrent forum / seminar

Offered online videos and regular updates about exhibitor new product launch and live broadcasts. It can closely following the latest industry trends.

Official Website

EP organized by SGCC & CEC, extensive resources from **Electric Power**

Data center Gathers IDC, System Integrators, Design Institutions, Telecom Operators

Commercial Users Smart Building, Contractors, Design /Engineering

45 years experience in organizing exhibitions in China, Adsale has 10,000+ industrial users resources

Gathering the most powerful energy storage users

Scope of Exhibits

- Energy Storage Technology and Materials
- Energy Management Systems (EMS)
- Energy storage equipment and components
- Energy storage system and EPC engineering
- Energy Storage and Power Conversions System(PCS)
- Software development and information communication
- Battery resource recovery and utilization
Battery testing and certification
- Electric vehicle charging and swapping and supporting equipment
Energy saving and integrated energy service equipment

New Energy Storage Seminars

- **New energy + power storage** for China's dual carbon goals
- Application and case sharing of new energy storage in the **electric power** industry
- Development and opportunities for **energy storage + industry and commerce**
- Design and security of **energy storage + data centre**
- Pain points of **energy storage + telecommunication** industry
- New Energy **Storage Products\ New Technologies** Release

Exhibitors/Product Introductions

ZHUHAI COMKING ELECTRIC CO., LTD.

(Booth No:4B21)

CK-NL-200 STANDARD ENERGY STORAGE CONTAINER

Overview The CK-NL-200 standard energy storage container is mainly composed of standard module (PACK), energy storage converter (PCS), energy management system (EMS), battery management system (BMS), fire protection system and other parts. It can be used in industrial and commercial occasions, with functions such as power grid optimization, peak and valley smoothing, emergency backup, etc., and the container covers a small area, has a high degree of centralization, and is easy to control and maintain the system.

JIANGSU WAEN NEW MATERIAL TECHNOLOGY CO., LTD

(Booth No:4S04)

WAEN ELECTRONIC ADHESIVE WAEN ® UV301

Waen®UV301 is a single component UV cured adhesive. The UV wavelength can quickly cure at 200-400nm, making it easy to use and operate, greatly improving production efficiency. Mainly used for the protection and fixation of electronic components.

GACIA ELECTRICAL APPLIANCE CO.,LTD

(Booth No:1K71)

SMART IOT CIRCUIT BREAKER

AICB2 intelligent Internet of Things Circuit Breaker integrates multiple functions, with short-circuit, overload, under-voltage, leakage, temperature and other multiple protection, support high-precision full power data acquisition, remote/local leakage self-detection, regular regular leakage self-check and support self-check not open, remote open and close control, local/remote mode switching and other functions.

Note:

Exhibitors/Product Introductions

TIANJIN XINGDA ELECTRIC TECHNOLOGY CO., LTD

(Booth No:2T50)

DIN EN TRANSFORMER BUSHING

DIN porcelain bushings is a type of porcelain bushings manufactured according to the German Industrial Standard (DIN). EN porcelain bushings is a type of porcelain bushings manufactured according to the European Standard (EN). DIN and EN porcelain bushings have good corrosion resistance and wear resistance, which can effectively prevent transformers from external impacts, vibrations, and physical damage. In addition, DIN/EN porcelain bushings also have good dustproof and waterproof performance, which can ensure the normal operation of transformers under harsh environmental conditions. Our company produces DIN/EN high and low voltage transformer bushings. Support design and development, welcome to contact.

JIANGNAN YIFAN MOTOR CO., LTD *

(Booth No:2S01)

ELECTRIC CHASSIS VEHICLE SERIES MOTOR&C-GIS INFLATABLE CABINET SERIES MOTOR

Electric Chassis Vehicle Series Motor&C-GIS
Inflatable Cabinet Series Motor.

Exhibitors/Product Introductions

CARGILL INVESTMENT (CHINA) CO., LTD (Booth No:2C15)	
CARGILL FR3® NATURAL EASTER DIELECTRIC FLUID	
<p>Cargill FR3® Natural Easter Dielectric Fluid: This is a type of insulation liquid for distribution and power transformers, using pure natural plant seeds as raw materials. It has the characteristics of high ignition point, non-toxicity, and rapid biodegradation, and has become a leader in the market for traditional mineral oil substitutes and ester insulation liquids. FR3 fluid outperforms mineral oil in overall cost savings, grid resiliency, transformer performance, fire safety, and environmental benefits. There have been no reports of fires in applications involving over 3 million transformers so far. Cargill FR3® Intended to contribute to the environmental protection concept of carbon neutrality and leverage its advantages to achieve the "dual carbon" goal.</p>	
CHANGZHOU OPLUS SMART TECHNOLOGY CO.,LTD (Booth No:3L06)	
NFC E-LOCK	
<p>NFC smart lock is truly a passive green and environmentally friendly high-tech smart lock. No need to install batteries, real passive; You don't need any keys, the mobile phone is the key; When the mobile phone is close, you can unlock or close the lock, and upload the lock status, GPS positioning, operator and other positioning information to the cloud platform in real time. The powerful app and background management function has many functions such as authorization, distribution and statistics, so that all lock status and personnel operation can be seen at a glance, eliminating the tedious manual management of a large number of mechanical, Bluetooth and other keys It also saves complicated work such as replacing batteries.</p>	
LEONHARD (SHANGHAI) ELECRICITY CO.,LTD. (Booth No:1S41)	
SIC APF	
<p>Compared with silicon carbide, with wide forbidden width and large breakdown field strength, silicon carbide has high pressure resistance; the drift area is small, improved power density; less conduction resistance, lower energy consumption and higher thermal conductivity and switching frequency.</p>	

Note:

Energy Storage Related Technologies/Products,

* Energy Storage Supporting Products. Data collection as of September 8, 2023.

Exhibitors/Product Introductions

LIAONING SHENPENG ELECTRIC POWER TECHNOLOGY CO.,LTD

(Booth No:4K33)

COMPOSITE CASING TERMINATION (ASSEMBLY)

Made of fiberglass reinforced casing and extruded silicone rubber umbrella skirt on the outer layer, the upper end cap and chassis are made of corrosion-resistant alloy material. Mechanical connectors for the torque control end bolts are connected to the cable conductors and sealed with oil filler and heat shrink tubing. Silicone rubber stress cones provide electrical stress control. The stress cone and the inner wall of the cable and composite sleeve are filled with insulating oil. Different cable fixing and sealing devices are used depending on the cable sheath and armor construction. Support insulators are provided for separate earthing and cross interconnection.

MEGGER CHINA CO., LTD

(Booth No:2E87)

MEGGER TRAX MULTIFUNCTION TRANSFORMER AND SUBSTATION TEST SYSTEM

TRAX is a multi-function test system for transformer substation testing. The test system replaces numerous individual testing devices which makes testing with TRAX a time saving and cost effective alternative to conventional measurements using separate instruments. TRAX is a unique test system for testing power, distribution and instrument transformers, as well as a variety of other substation components.

Note:

Energy Storage Related Technologies/Products,

* Energy Storage Supporting Products. Data collection as of September 8, 2023.

Exhibitors/Product Introductions

JINAN HENGFENG ELECTRIC POWER EQUIPMENT CO. LTD

(Booth No:2T45)

CAPACITANCE AND TAN DELTA TESTER

Hengfeng capacitance and tan delta tester measures the capacitance and dielectric loss factor (tg) of high voltage electric equipment. Accuracy: $C_x: \pm(1\%rdg + 1pF)$ $tg(1\%rdg + 0.00040)$ Anti-interference index: Frequency conversion anti-interference, in 200% interference can still achieve the above accuracy Capacitance range: internal high voltage: $3pF \sim 80000pF/12kV$ $60pF \sim 1.2uF/0.5kV$ resolution: Max. $0.001pF, 4 dgt$ 1. 7" high resolution color touch screen. 3. Multiple automatic double variable frequency, which can effectively resist the frequency interference of test site and ensure the accuracy and stability of test results. 3. UST+GST+CVT+ GSTg+ CVT ratio + polarity+phase difference+4 channels 4. 4-channel function, measuring four test object in a single test 5. Reserve the interface for external standard capacitor and external transformer 6. Internal memory with time/date stamp 7. Internal thermal printer 8. USB port for export test data to USB flash drive.

Note:

Energy Storage Related Technologies/Products,

* Energy Storage Supporting Products. Data collection as of September 8, 2023.

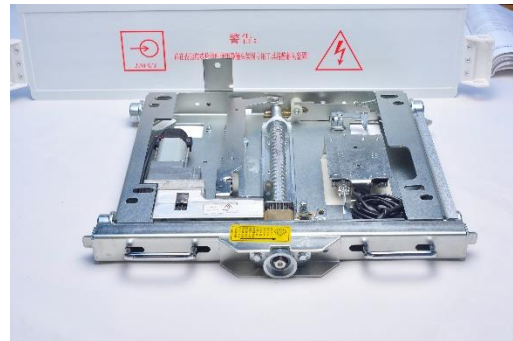

Exhibitors/Product Introductions

YUFENG ELECTRIC CO.,LTD

(Booth No:1H61)

CHASSIS

The chassis truck is mainly used to carry circuit breakers, transformers and other components in the withdrawable switchgear, push them in and out, and serve as an auxiliary operation for connecting the components to the busbar. When the chassis car cooperates with the internal mechanism of the circuit breaker and other interlocking mechanisms of the central cabinet, it can meet the "five-proof" interlocking requirements in GB3906.

SHANGHAI MINGLVE MANAGEMENT CONSULTING CO.,LTD.

(Booth No:4G33)

MEGAMERGER.CH'S TWO MAJOR SERVICES AND FIVE CORE BUSINESSES IN THE ENERGY & ELECTRICITY SECTOR.

Two Major Services: Supporting the construction of new electric power system and the digital transformation of the electricity sector; assisting in the market-oriented reform of the electricity sector and the development of green energy for carbon peak and carbon neutrality. Five Core Businesses: Digital Intelligence Transformation: Top-level design, digital business operations, and upgrades in organization and technology for enterprise digital transformation. Marketing Services: Excellent power supply service system construction, transformation planning of new service halls, and efficiency enhancement through integrated channel fusion. Human Resources: Digital organizational change and efficiency optimization, and cultivation and development of digital talent echelons. Integrated Energy: Development planning and market expansion for integrated energy business, and digital operations for integrated energy. Brand Culture: Service brand planning and creation, and brand marketing .

Note:

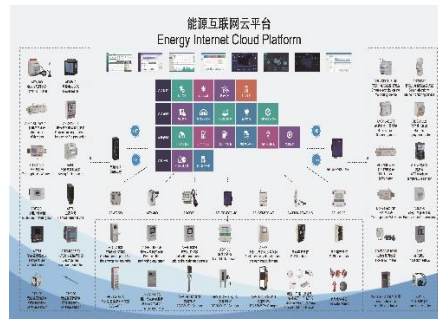

Energy Storage Related Technologies/Products,

* Energy Storage Supporting Products. Data collection as of September 8, 2023.

Exhibitors/Product Introductions

ACREL CO., LTD. ***(Booth No:1B21)****ENERGY INTERNET OF THINGS**

In response to the requirements of the National Energy Administration for promoting the development of digital and intelligent energy, the Acrel EIoT energy IoT cloud platform is based on the IoT data center and implements unified upstream and downstream data standards. Users only need to purchase Acrel IoT sensors, select a gateway, install and scan the code themselves to obtain the required data services, achieving on-site hardware debugging free and effectively reducing project operation and maintenance costs. The main functions involve commercial prepayment, electricity safety, energy consumption analysis, charging piles, photovoltaic monitoring, intelligent lighting, power configuration, air conditioning control, photovoltaic monitoring, etc., achieving business collaboration, scene integration, energy interconnection, and the integration of the energy Internet of Things ecosystem.

**GMC-INSTRUMENTS(TIANJIN) CO., LTD.****(Booth No:3E03)****MULTIFUNCTIONAL POWER QUALITY ANALYZER "LINAX PQ3000"**

The LINAX PQ3000 combines the characteristics of a normative power quality measurement device with functions for energy consumption and condition monitoring. The modern, multi-lingual design allows operating and parameterizing the device via website or the high-resolution color TFT display (800x480px). The integrated webserver provides remote acquisition, visualization and analysis of measured data. No additional software is required.

Exhibitors/Product Introductions

KAMINO(SHENZHEN)TECHNOLOGY CO.,LTD

(Booth No:3J17)

NANOCRYSTALLINE CUTTING CORE

Focus on research and development and test many years, using the mature annealing process, high performance, using imported curing glue water, improve the core hardness, and use of special antirust technology, greatly improve the nanocrystalline/silicon steel core rust resistance, nanocrystalline/silicon steel core rust resistance leading domestic and abroad, with the improved cutting process, keep the maximize the performance of the core before cutting.

JIANGSU XINYA HIGH VOLTAGE TESTING EQUIPMENT CO.,LTD

(Booth No:3K21)

TRANSFORMER COMPREHENSIVE TEST SYSTEM

This system is mainly used for 35kV and below voltage level of oil immersion or dry power transformer frequency, induction, empty load, load and temperature rise test, the main components include induction regulator, air load test system, precision current/voltage transformer, temperature inspector, DC resistance tester, test transformer and so on. All pilot projects are completed by computer control, operation, operation and recording.

Exhibitors/Product Introductions

SHANGHAI SUHUI ELECTRIC CO.,LTD.**(Booth No:3K05)****LATCHING RELAY**

Shanghai Suhui Electric Co., Ltd. is a scientific and technological enterprise specializing in R & D, manufacturing, sales and integration of magnetic latching relay, current transformer and shunt. Products are widely used in smart meters, smart home, reactive power compensation, communication, energy and other related fields. The company has a complete set of quality assurance system, has passed ISO9001, ios14001 certification, some products through Germany TUV, the United States UL and China CQC certification, so the products meet the requirements of the European Union Rosh. Experienced R & D personnel, professional automatic production testing equipment, clean and dust-free production workshop have laid a solid foundation for customers to provide high-quality products. In the increasingly competitive international market in the future, Suhui Electric will, as always, serve customers all over the world with excellent quality, competitive price, punctual delivery cycle and professional after-sales service. We are willing to work hand in hand with you for common development.

Note:

Exhibitors/Product Introductions

SHENZHEN TIEON ENERGY TECHNOLOGY CO., LTD #

(Booth No:3G06)

INTELLISYS SERIES SPC 2.0 INTELLIGENT LOW VOLTAGE DISTRIBUTION SYSTEM

1. Modular design: feeder unit is composed of standard modules, integrating sensing function and display function; It is applicable to switches of mainstream brands at home and abroad to realize design standardization; 2. Wireless acquisition: electronic application technology is adopted to realize wireless data acquisition of temperature and full power; 3. Insulation fastening technology: insulation nail fastening technology is adopted for primary connection, which is both reliable for fixed connection and convenient for live draw out operation and maintenance; 4. Saving energy consumption of equipment: through infrared induction design, the display system is controlled to turn on and off, saving electric energy and extending the service life of the display system.

BEIJING XINCHUANG CHUNSHU RECTIFIER CO., LTD. *

(Booth No:3K45)

POWER SEMICONDUCTORS

Power Semiconductors: Thyristor (Phase control, Fast, GTO, Light triggered, Pulse), Rectifier diode, Power Module, Disc IGBT/IEGT. Rotating Excitation Rectifier Series: Rotating diode, Assemblies, Rotary disc and matching rectifier device Power Unit (customizable): Rectifier bridge, Pulse high power generator, Pulse power supply Heat Sinks (customizable): Moulding/Heat pipe/Water cooling heat sinks

Exhibitors/Product Introductions

ZHEJIANG MANCHANG ELECTRIC CO., LTD

(Booth No:3K65)

MAIN PRODUCTION: DUAL POWER SUPPLY, CPS, FIRE DETECTOR, SELF RESETTING OVERVOLTAGE AND UNDERVOLTAGE, SURGE PROTECTOR, MOLDED CASE CIRCUIT BREAKER, INT

Low voltage electrical appliances refer to electrical products that play the role of on-off, protection, control or regulation in circuits with AC rated voltage of 1200V and below and DC rated voltage of 1500 and below. Application classification: control appliance, power distribution appliance, protection appliance, command appliance, executive appliance, etc.

THERCAM INC

(Booth No:3S24)

INFRARED THERMAL CAMERA

The TherCam SV-H6D Advanced Thermal Imaging Camera offers exceptional resolution and sensitivity for condition monitoring, electrical and mechanical inspection, and building inspection. This handheld advanced thermal imaging camera is equipped with a 640 x 480 thermal resolution detector to measure extreme temperatures while producing crisp and clear imagery accurately. Inspectors can survey high-voltage, hazardous targets safely and quickly and diagnose electrical and mechanical failures. The SV-H6Ds interchangeable lenses also offer complete coverage of near and distant targets, with the laser distance meter ensuring the focus needed for accurate temperature measurement. With the advantages of accurate temperature measurement, precise imaging, ease of use, and portability, the SV-H6D can support the rapid evaluations of industrial environments. High and low-temperature capabilities, one-click capture, and video functions are also convenient for field operators who need to record

Exhibitors/Product Introductions

XIAMEN MINGHAN ELECTRIC CO.,LTD. #**(Booth No:1D41)****SMARTSWITCH POWER DISTRIBUTION SYSTEM**

SmartSwitch system is intelligent power distribution system integrating core capabilities of networking, computing, storage and application, together with digital MV switchgear & LV switchgear. It effectively realizes remote status monitoring, programmed controlling, and intelligent management, etc.

Smartswitch offers functions of full power monitoring, system running status monitoring, energy-saving management, position status management, equipment life cycle management, environmental monitoring and network communication Information and data application etc.

**MERSEN ZHEJIANG CO., LTD. *****(Booth No:1T01C)****NH1L-G 1140V FUSE**

NH1L-G series of products through a unique structural design, AC and DC universal, with high voltage, high breaking capacity, resistance to inrush and impact current and other characteristics. The fuse adopts a multi-row narrowly designed to withstand high voltage. The fuse is filled with high-purity quartz sand, which can be forced to cut off the high-energy fault current instantaneous and effectively reduce the short-circuit current on the line and the impact of the equipment, no spraying arc, suitable for high-voltage, no flying arc, and other severe occasions. Severe occasions. The product has a variety of optional installation methods and can be equipped with base or screw mounting, which is space-saving.

MERSEN SHANGHAI CO., LTD.

(Booth No:1T01A)

CURRENT-LIMITING FUSES AND ACCESSORIES, FUSE BLOCKS AND HOLDERS, POWER DISTRIBUTION BLOCKS, LOW VOLTAGE DISCONNECT SWITCHES, HIGH POWER SWITCHES, ERCU, FUSEBOX, CCD, SURGE PROTECTIVE DEVICES, HEATSINKS, LAMINATED BUS BARS

Mersen Electrical Power provides a comprehensive line of current-limiting fuses (low voltage, general purpose, medium voltage, semiconductor, miniature and glass, and special purpose) and accessories, fuse blocks and holders, power distribution blocks, low voltage disconnect switches, high power switches, ERCU, Fusebox, CCD, surge protective devices, heatsinks, laminated bus bars, and more. For more information, call 021-67602388 or visit www.mersen.com.

SHANDONG LIJIAN CNC EQUIPMENT CO., LTD

(Booth No:2A01)

BASBAR MACHINERY

The main function is to cut and punch copper and aluminum busbars (round holes, long round holes, square holes, special-shaped holes), flat bending, vertical bending, embossing and other different processing. Products are widely used in high and low voltage switch cabinets, box-type substations, transformers, bus ducts, communication equipment, air conditioning and refrigeration, sheet metal, chassis cabinets and other industries.

Exhibitors/Product Introductions

CHINA BLUESTAR CHENGRAND CO., LTD.

(Booth No:1T31)

ELECTRICAL INSULATION SILICONE RUBBER

GRESIL®GX-56 series, with good electrical insulation properties, flame retardant properties, mechanical properties and excellent processing performance. Have reports of UV aging, fire R22/R23, 1A4.5 resistance to tracking, hydrophobicity, flame retardancy, etc. from a third-party authority

STAUBLI (HANGZHOU) MECHATRONIC CO., LTD.

(Booth No:1H45)

MULTILAM FLEXO ML-CUX

(1)Two-component contact element, very good electrical and mechanical properties combined with high mating and sliding cycles. (2)High rated and short circuit current carrying capacity, facilitates small-sized designs with only one ML-CUX. (3)Large operating range, high flexibility and compensation of large tolerances, angular and radial misalignment. (4)Flexible with high self-retaining force, simple and fast assembly in rectangular mounting groove. (5)Very high lifespan with consistent performance characteristics, lower TCO. (6)100% tested product properties, guaranteed performance and reliability.

DEKRA ASIA PACIFIC *

(Booth No:1H03)

DEKRA ONE-STOP SOLUTION IN GLOBAL MARKET FOR POWER TRANSMISSION & DISTRIBUTION EQUIPMENT

As one of the world's leading expert organizations, DEKRA has extensive experience and expertise in the low-, medium-, and high-voltage testing fields, and has provided a large number of manufacturers and power companies with testing and certification services and facilitate them in expanding into global markets. DEKRA has professional testing labs with multiple accreditations such as ISO/IEC 17065, ISO/IEC 17025 and ISO/IEC 17020. DEKRA has continued to expand its testing capabilities in low-, medium-, and high-voltage fields. In 2009, DEKRA bought out KEMA Quality and in 2017 acquired VEIKI-VNL, a world famous medium- and high-voltage testing lab based in Budapest, Hungary and a member of the Short-Circuit Testing Liaison (STL). In addition, DEKRA is a testing agency certified by Dutch Accreditation Council (RVA).

(Booth No:1K41)

SEPERABLE CONNECTOR/PLUG-IN TERMINAL

Separable connector is suitable for 40.5 kV and below inflatable ring network cabinet, air insulated switchgear cabinet, cable distribution box and other electric control equipment, be used to connect the power cable and outer cone type bushing. Outer bushing is applicable for EN50181 standard and type C and F of DIN47637 standard and etc. The internal plug-in terminal is suitable for 27.5KV railway system and 40.5kV and below power system inflatable ring cabinet, GS switch cabinet, transformer and other power control equipment. Matching outer cone type bushing and inner cone type bushing.

CHANGZHOU YIHENG ELECTRIC TECHNOLOGY CO., LTD.

(Booth No:1S43)

ENVIRONMENTAL PROTECTION ENGINEERING PLASTICS FIXING AND SEALING POLE POST, INSULATING CYLINDER AND INSULATING PULL ROD

1. 12kV/24kV/40.5kV Primary circuit conducting parts of vacuum circuit breaker with different current levels and insulation parts engineering Plastics fixing and sealing pole post, insulating cylinder and insulating pull Rod.
2. 12kV~40.5kV CGIS three-position primary isolated partial conductive parts and insulators with different current levels, It is specially used for SF6 insulating medium and clean air insulated gas cabinet, engineering Plastics fixing and sealing pole post, insulating cylinder and insulating pull Rod.

NINGBO TONYLUM NEW MATERIAL TECHNOLOGY CO.,LTD.

(Booth No:2T15)

EXPLOSION-PROOF SHELL

The product is suitable for waterproofing, fireproofing, explosion-proof and direct burial withstand voltage protection of the cold and hot shrinkable intermediate joint of cross-linked polyethylene insulated power cable with a nominal cross-section of 50-630mm². The product is made of SMC (or stainless steel, aluminum-magnesium alloy), which has tough physical properties, can avoid power damage by external forces, and can effectively prevent the shock wave and flame generated by the explosion in the power intermediate joint, so as to prevent the occurrence of secondary disasters.

BEIJING QINGCHANG POWER TECHNOLOGY CO., LTD

(Booth No:1F21)

GAS INSULATED RING MAIN UNIT (ECO-FRIENDLY GAS TYPE/SF6 GAS TYPE)

The QCX series of eco-friendly GIS product adopts environmental protection gas instead of SF6 gas to insulate, and has plenty of advantages which are: small in occupied area, components are insulated and not interfered by the environment, high operation reliability, convenient operation, long maintenance period, less maintenance workload, quick installation, low operation cost, no electromagnetic interference, etc. Moreover, this product could be used in rail transit, clean-energy power station and so on.

TEAMCHAIN ELECTRICAL EQUIPMENT CO., LTD.**(Booth No:2S22)****MGC MOSER GLASER TRANSFORMER BUSHING, WALL BUSHING AND BUSBARS**

Moser Glaser Ltd MGC Moser Glaser Ltd, founded in Basel in 1914, is a pioneer in the field of solid insulation. The RIP technology (resin impregnated paper) was developed by MGC in the late 1950s and has been sold under the brand name DURESCA® for busbars and later also for bushings. Swiss Quality Combined with Global Experience Due to this long-standing expertise we have extensive know-how with more than 60 years of field experience. Given our core skill in RIP, we are focusing on the two business segments busbars and bushings. We manufacture all products at our factory located in Kaiseraugst, Switzerland. Thanks to the size of our company with all departments under a single roof, we can offer a high level of responsiveness. As an independent producer of DURESCA® busbars and bushings, MGC Moser Glaser is the ideal and valued partner for our global customers.

GSC60 ONE INSTRUMENT FOR ALL ELECTRICAL SAFETY TESTS AND POWER QUALITY ANALYSIS

One instrument for all electrical safety tests and Power Quality analysis GSC60 was designed with the aim of making safety of electrical installations visible and valuable, easily and quickly. Thanks to the new HTOS system the unit displays a message OK - NOT OK after completing the test. The user interface, totally updated under HTOS, permits to set and carry out measurements in few steps. You can store all recorded data and create folders and subfolders for each kind of test adding comments and notes by means of virtual keyboard. GSC60 is also a three-phase power and energy consumption analyzer boasting, as unique feature, its FREE APP HTAnalysis compatible with iOS and Android. Test results can be transferred through Wi-Fi onto smartphone or tablet enclosing a picture, a video or a voice note to each measurement. You can transfer everything onto HT Cloud and make data available in real time for your colleagues all over the world.

LOVATO ELECTRIC

(Booth No:2S05)

METERING INSTRUMENTS AND CTS

Wide screen color LCD;The large size of the colour LCD (4.3") allows for the optimal view of measures and parameters in a clear, simple and intuitive way. The standard cutout dimensions (92x92mm) ensures a perfect compatibility with the usual front panel solutions. 10 Languages:The language shown can be selected from a large number of choices: English, French, German, Italian, Spanish, Portuguese, Polish, Russian, Czech, Chinese. Programmable LEDs:3 front LEDs are programmable and let the user know the status of the device at any time: alarms programmed by the user, status of digital inputs or outputs, emission of pulses indicating energy consumption, communication in progress. High accuracy level for measurements; NFC configuration; it is possible to configure and modify parameters (even when the device is not powered) through LOVATO App. PLC logic; Programming with "contacts" (Ladder) is simple and intuitive thanks to the use of configuration software.

BUSBARS

Located in Southwest Airport Economic Development Zone, Shuangliu, Chengdu, we focus on the production of reliable and safe busbars. We have advanced automated production lines, producing busbars ranging from 100A to 6300A. High efficiency, low cost, and fast delivery are our advantages. We promise we will never make fake busbars.

(Booth No:2C56)

VACUUM INTERRUPTER

HUBEI HANGUANG TECHNOLOGY CO.,LTD

Founded in 1968,with over 40 years of experience in manufacturing electric vacuum devices, it is a key enterprise of electron vacuum devices industrial,The high-tech enterprises in Hubei Province. The registered capital is RMB 150 million.Company is capable of developing and producing vacuum electronic devices,electricity electrical equipments and special electronic equipment,owning precision machining, special ceramics manufacture and other systems supporting production capacity, many times undertaken national development and production. Company has Hubei province academician expert workstation, Hubei province level enterprise technology center and Engineering Technology Research Center, military and civilian goods quality management system passed the "GJB9001B-2009" and "ISO9001-2008" standard.Company production of vacuum interrupter products are mainly used for vacuum circuit breaker, vacuum recloser, vacuum load breaking switch, vacuum contactor.

(Booth No:2S23)

METAL OXIDE VARISTOR,SURGE ARRESTER,DROP OUT FUSE,INSULATOR

We are manufacture for metal oxide varistors, surge arresters, composite isulator, dropout fuse and so on. As a key parts varistor manufacturer, we can produce from 3kV - 500kV surge arrester according to IEC 60099-4, IEEE and GB standard, both of distribution class and Station class with polymer housing and porcelain housing. Also we have got the KEMA type test for 10kA 3-36kV distribution type, and XIHARI type test report for 110kV & 220kV station type with our own varistors. Just contact if you have any more questions.

YUYAO JERA LINE FITTING CO.,LTD

(Booth No:5G41)

LOW VOLTAGE INSULATION PIERCING CONNECTOR ZOP-57

Product information: Low voltage piercing connector ZOP-57 (25-150/25-95mm²), either called Insulation piercing clamp is developed to branch the insulated service electrical line from main electrical line, without cutting the sheath of main cable. Its widely used in nowadays electrical line constructions. Key Features:

1. UV-resistant and waterproof materials
2. Convenient to install without cutting the jacket
3. Outdoor usage for construction applications like buildings, street lights.
4. Captive and flexible end cups
5. Manufacture according to the standard: EN50483-4:2009
6. IPC supplier/factory direct price

ZHEJIANG JOHAR TECHNOLOGY CO.,LTD. *

(Booth No:1J40)

POWER SYSTEM PASSIVE WIRELESS TEMPERATURE MONITORING SYSTEM

Johar developed a passive wireless power temperature monitoring system based on UHF RFID sensors. It is battery free, long life cycle, stable, maintenance-free, and wireless. It can monitor the temperature of the key nodes of power equipment in real time without affecting the insulation and safety of power system. The sensor has a wide measurement range ($-40 \sim +150^{\circ}\text{C}$), small sensing error (less than $\pm 1^{\circ}\text{C}$); the overall flame-retardant grade is UL94-v0 ; and it can resist up to $+220^{\circ}\text{C}$.

JIANGXI YIFA ELECTRIC POWER TECHNOLOGY SHARES CO., LTD#

(Booth No:1H22)

THREE-PHASE OIL IMMERSED TRANSFORMER

three-phase oil immersed transformer A power transformer is a static electrical device that is used to change a certain value of AC voltage (current) into another or several different values of voltage (current) of the same frequency. Transformer is used to transform AC voltage, current and transmission of AC power a static electrical equipment. It is based on the principle of electromagnetic induction to achieve electrical energy transfer. Transformers can be divided into power transformers, test transformers, instrument transformers and special purpose transformers: power transformers are power transmission and distribution, power users distribution of the necessary equipment; Test transformer A device for performing voltage resistance (boost) tests on electrical equipment; Instrument transformers for electrical measurement and relay protection of distribution systems (PT, CT).

OPTIMIZER3 CIRCUIT BREAKER MONITOR

The INCON® Optimizer3 Circuit Breaker Monitor delivers advanced automated reporting of all critical circuit breaker diagnostics to ensure uptime and facilitate predictive maintenance. The early small-scale problem detection and automated system performance evaluation capabilities of the Optimizer3 help improve the efficiency, service life, and reliability of electric utility systems. The Optimizer3 is ideal for high-voltage, live or dead-tank, oil, vacuum or gas circuit breakers and can be magnetically wall-mounted without having to drill.

ZHUHAI GOPOWER SMART GRID CO., LTD

(Booth No:3E43)

SF6 LOAD BREAK SWITCH

FWX-24/630-20 LBS installed on the pole is suitable for rated voltage 12/24/40.5kV, rated current 630A50/60Hz Distribution network breakingThe load current or overload current in a power system that automatically isolates the faulty sections of the distribution line. Switch with the latest technology electronic controller, manual operation, electric operation and remote operation. The electronic controller is installed in the stainless steel box and can be used under various climatic conditions. In addition, cable and wireless modems can be installed in the box to realize remote monitoring and control. Simple installation and arrangement on the pole is convenient, quick and low construction cost.

(Booth No:2T43)

RMU (RING MAIN UNIT) PLUG RFID TEMPERATURE TAG

RMU plug RFID tag is specifically developed for RMU temperature detection. With the customized RFID temperature detection tag embedded inside and fixed in the cabinet, RMU temperature can be detected and monitored constantly and continuously through the RFID plug tag, which collected by RFID reader that installed also in the cabinet. The wireless, fully passive temperature detection solution is small and easy to install. RFID technology has strong anti-EMC interference capability with stable, accurate temperature data. And its inside ID (RFID) helps fast to locate the alerting facilities and solve the problem. It is an ideal solution of remote temperature monitoring and maintenance for various RMU electrical facilities.

ZHONGKE ELECTRIC POWER EQUIPMENT GROUP CO.,LTD.

(Booth No:1K08)

ZVP-12 INDOOR HIGH-VOLTAGE VACUUM CIRCUIT BREAKER

ZVP-12 indoor high-voltage vacuum circuit breaker is the latest generation of the serialized 12kV VCB developed by our company. It can be widely used for the control and protection of power distribution system in power grid, power plants, substations and other fields. With full specifications, this product covers the whole 12kV series with the breaking current of 50kA and below, which can meet various operation demands in different conditions. It has advantages like structure modularization, small closing work, high safety and long mechanical life. This product meets requirements of relevant standards, such as GB 1984-2014 "AC High-voltage Circuit Breaker" and IEC 62271-100. Its performance reaches the grade of M2-E2-C2. The mechanical service life is 20,000 to 60,000 times. It can be operated normally in the temperature ranging from -45C to 75C and at the altitude of 5000 meters and below.

ULTRA HIGH PRECISION CURRENT TRANSDUCER

Over ten years we have been dedicated to providing the electric parameters isolation-measurement solutions for the users. Our company has perfect production system, perfect research and development system, perfect quality assurance system and high quality sales & customer-service team. PAS series product has a complete range of models, including electric current transducer based on fluxgate principle, current transducer based on HALL effect, voltage transducer based on HALL effect, current transmitter, voltage transmitter, power transmitter, leakage current transmitter, switch-output transmitter and intelligent electric transmitter, etc.. We have already provided many high quality and reliable products customized by users requirement and have won the much praise. Especially Model Type: HPIT-C25-1000S, $\phi 25\text{mm}$ hole, Primary Nominal Current: 1000A, the Accuracy can be to 0.001%. Feed back element in high performance gradient amplifiers for MRI and so on.

CT8009CIRCUIT BREAKER TESTER

Suitable for mechanical and electrical characteristics testing of various vacuum switches, oil switches, SF6 switches, isolation switches, and GIS composite appliances both domestically and internationally. Equipped with testing interfaces for three analog travel sensors and three digital travel sensors. Can test the opening and closing time, bounce, stroke, and speed waveform of high-voltage switches. Equipped with functions such as ordinary metal contact testing, resistive contact testing, graphite contact switch testing, and dual terminal grounding testing.

HAWKEEP(SHANDONG) PHOTOELECTRICITY TECHNOLOGY CO., LTD.

(Booth No:2K51)

LASER RANGE FINDER

This HAWKEEP SP series rangefinder is easy to operate and portable, with multiple measurement modes such as distance measurement, height measurement, angle measurement, and two-point measurement. It can enable power grid operators to quickly and accurately obtain relevant distance data, greatly improving the efficiency of power grid work. Functional features (13 items): Linear distance Horizontal distance Vertical height angle velocity measurement Two point height measurement (height difference) Flagpole mode (Golf mode) Scanning function (continuous measurement) CL closest distance measurement (closest distance lock) FA longest distance measurement (longest distance locking) Fog adaptive mode

THREE-PHASE FIVE-COLUMN ANTI-RESONANCE VOLTAGE TRANSFORMER

This product is a three-phase five-column anti-resonance voltage transformer, which can effectively prevent ferromagnetic resonance from burning the transformer. This product can still operate normally for a long time when the system has a 100% ground fault, while protecting the winding to generate voltage to make the relay operate; It is suitable for voltage measurement and relay protection in power systems with AC 50Hz and rated voltage of 10kV.

JINGDEZHEN JINGGUANG GINSON ELECTRIC CO., LTD.

(Booth No:2K27)

VACUUM INTERRUPTERS

Vacuum Interrupter is the core component of medium and high voltage power switch. It's main function is to quickly extinguish the arc and inhibit the current after the medium and high voltage circuit cuts off the power supply through the excellent insulation of vacuum in the pipe, so as to avoid accidents and accidents. It is mainly used in power transmission and distribution control system, as well as metallurgy, mining, petroleum, chemical industry, railway, broadcasting, communication Industrial high frequency heating and other power distribution systems. All products of the company meet the requirements of national standards or IEC standards. The unique silver tungsten carbide contact technology and double holding technology for electric holding and permanent magnet holding of vacuum contactor are in a leading position in China.

CABINET TYPE HEPTAFLUOROPROPANE GAS FIRE EXTINGUISHING DEVICE

The gas fire extinguishing agent is stored and packaged into a fire extinguishing cabinet, which is beautiful, portable, movable, flexible and convenient to install. It is usually placed in the protection area to be protected. In case of fire, it does not need to go through the pipeline to directly spray fire extinguishing in the protection area. It has high fire extinguishing efficiency, fast speed, low toxicity, no damage to the equipment, and excellent performance of the fire extinguishing device. Its control part can be connected with the fire control center, or it can be separately equipped with a gas fire extinguishing controller to form a system, which brings convenience and convenience to users Flexible choice.

JIANGSU LAFALT ELECTRIC CO., LTD

(Booth No:1F05)

DYNAMIC VOLTAGE RESTORER

Vscol series dynamic voltage restorer (DVR) is currently recognized as an effective series compensation device for maintaining the stability of the supply voltage of sensitive loads. The device outputs a voltage with adjustable phase and amplitude to ensure that the voltage of the sensitive load is still within an acceptable range when disturbed by the system voltage. Lafalt Electric Vscol series DVR has the remarkable characteristics of wide voltage compensation range, fast response speed, strong impact resistance, high equipment efficiency, long life, strong overload capacity, and cover small area.

SHENZHEN CHUANGYIN CO.,LTD.

(Booth No:2F10)

INSTRUMENT TRANSFORMER & CABLE ACCESSORIES & COMPOSITE INSULATION SLEEVE OF TRANSFORMER

Chuangyin is a national high-tech enterprise which specializes in designing and manufacturing instrument transformer (low voltage & medium voltage), split core CT, Rogowski coil, cable accessories, terminations, busbar, Composite insulation sleeve of transformer. Through 18 years developing, Chuangyin already got series certificates, such as ISO9001, 14001, 18001CE, TUV UC2/UC3, SGS, KEMA, UL, etc. Customers are throughout more than 50 countries. Three production bases are available to meet your capacity requirements. Welcome to contact us.

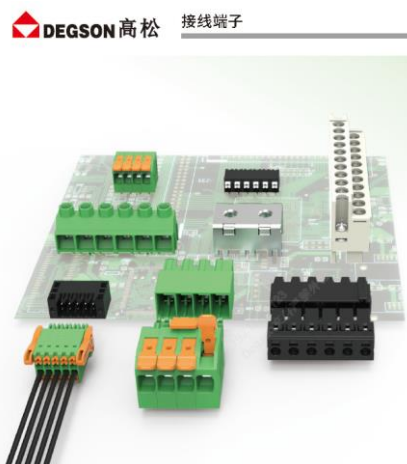

DEGSON TECHNOLOGY CO.,LTD.

(Booth No:2C41)

TERMINAL BLOCKS

DEGSON has a full range of high performance connector series used for device connection, including PCB Terminal Blocks, Barrier Terminal Blocks and Pluggable connectors. Through-wall connectors used for internal and external connection of the device. With general screw connection technology and innovative spring connection technology, Degson can provide solutions for signal, data and power transmission for various applications.

Exhibitors/Product Introductions

ROGOWSKI TECHNOLOGY (SHANGHAI) CO., LTD.

(Booth No:2C55)

Y-FCT FLEXIBLE ROGOWSKI COIL

Y-FCT is a flexible current transducer based on the Rogowski principle, particularly suitable for measurement in combination with portable devices. Y-FCT coils are available in different sizes and can be supplied according to customers' design, therefore they can be used in all those applications, in which traditional transducers are not fitting due to their size and/or weight. High linearity from 1A to 100kA Wide dynamic range Very useful with large size or awkward shaped conductors or in places with limited access No danger from open-circuited secondary Not damaged by large overloads Non-intrusive, no power drawn from the main Measurement uniformity at any position of the conductor inside the coil Excellent degree of rejection to the external current conductor

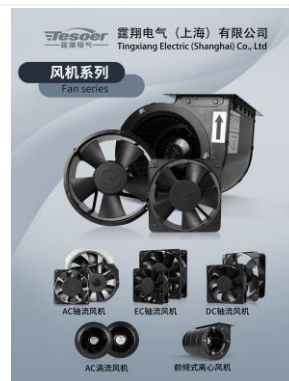

TINGXIANG ELECTRIC (SHANGHAI) CO., LTD

(Booth No:2E85)

COOLING FAN, VENTILATION SHUTTER, TEMPERATURE CONTROL HEATER, CABINET LIGHTING, FILTER FAN

Axial flow fan series: all sizes and parameters can be customized. All fans are made of imported ball bearings, which is more stable and has a longer service life. Vortex fan series: compact structure, convenient installation, stable and reliable operation, protection grade IP54, insulation grade for customers to choose and customize, products through EU certification and ROHS certification;

GUANGDONG EBG ELECTRONICS CO., LTD

(Booth No:1K31)

RESISTORS

Guangdong EBG Limited EBG-Shenzhen was founded by Shenzhen Science. The major products are high precision metal film resistor, high power and high voltage thick film resistor, as well as other high performance resistors.

Exhibitors/Product Introductions

CHENGDU TALY TECHNOLOGY CO., LTD. ***(Booth No:3D35)****RTV ANTI-POLLUTION FLASHOVER SILICONE COATING AND FACTORY DIP COATING FILM**

TALY innovatively invented the factory dip coating technology for insulators, as well as its mating equipment, TALY has realized dip coating technology key process automatic control. The appearance of dipped products is smooth and uniform, with consistent thickness, good adhesiveness and good homogeneity, and with no holiday, no sagging, and no accumulation. Product quality is stable and process is controllable. It is suitable for all kinds of glass (porcelain) cap and pin type suspension insulators and post insulators. Meanwhile, the color of RTV anti-pollution flashover silicone coating can be adjusted according to customer requirements. The operation process has no dust and pollution to the environment. The production process is more friendly and safe to the environment and human health.

**SHIJIAZHUANG SUIN INSTRUMENT CO.,LTD****(Booth No:1K12)****POWER QUALITY ANALYZER**

Waveform real-time display(4 voltages/4 currents)
Half-period RMS measurement (voltage and current)
intuitive operation variety of optional current clamps
Measurement of harmonics can be up to 100 times.
Transient capture Vector, Trend, Bar Graph and events
table display Built-in 32G memory card WIFI
communication is supported.

MINSAL ELECTRIC GROUP CO., LTD

(Booth No:2L08)

INDOOR AND OUTDOOR VACUUM CIRCUIT BREAKER, ZINC OXIDE LIGHTNING ARRESTER, CURRENT AND VOLTAGE TRANSFORMER, HIGH-VOLTAGE ISOLATION SWITCH, HIGH-VOLTAGE

Minsal Electric Group Co., Ltd. is one of the professional manufacturers in the domestic high-voltage transmission and distribution industry. The company takes Xiangyang Industrial Park in Liu City, the capital of China's electrical appliances, as its manufacturing base and rapidly expands the market with a combination of online and offline sales models. Now it has formed a diversified enterprise integrating R&D, production, The company is committed to serving China's power and distribution systems to provide safe and stable products and services. It mainly produces and sells electrical equipment such as vacuum circuit breakers, zinc oxide lightning arresters, fuses, transformers, isolation switches, load switches, cable accessories, cable branch boxes, wall-through casing, ring network inflatable cabinets, etc. The company has a strong technical force, exquisite production technology, advanced testing equipment, and a perfect scientific management system. The company has passed the IS

ZHEJIANG QLG ELECTRIC POWER FITTING CO., LTD

(Booth No:2H03)

POWER FITTING SERIES PRODUCT

Zhejiang QLG electric power fitting Co., Ltd, focus on the R&D, production and sales of power fitting, cable accessories and cable terminal lug, therewithin, with decades of development, the CU-AL series terminal lug is currently our main product. Given to the success in the series of products pre-mentioned, our company are in the leading position of the industry of power fitting nowadays.

SUZHOU KIANDE ELECTRIC CO.,LTD

(Booth No:1L02)

AUTOMATIC BUSBAR ASSEMBLY LINE

Automatic assembly line is customized according to clients busbar type. It can achieve unmanned operation no matter the busbar is fixed by rivet or bolt. Currently the busbar type is mainly divided into two types: two-piece type and four-piece type. By automatic assembly and fixing, the automatic assembly machine will help to reduce manpower and improve the product quality and working efficiency. The working principle is to recognize the busbar type and adjust all the parameters in the machine automatically by scanning the bar code. By module interconnection among PLC, network, touch screen and IPC etc., automatic assembly machine can also achieve information communication with ERP, automatic inspection machine and other related machines. Besides that, automatic assembly machine has self-checking functions by self diagnosing each input and output signal to avoid failures. Furthermore, data statistics for machines OEE (comprehensive utilization rate) is helpful for future data analysis

超高频背夹: M6080R

多功能可选 | 3~15米多标签识读 | 2块6Ah电池双倍续航
弹性卡扣固定 | 手机/平板随意组合 | 手柄握持 | 无侵权风险

多功能可选:

UHF RFID + 1D/2D + IrDA | 激光抄表 + RS485
+ 安全单元 + 手电筒 + 6Ah锂电池 + 充电宝 + BT5.2

专利号:

201920611733.7
& 201420646898.5

任意手机组合示意图

产品特点:

- ❖ 输出功率: 0~33dBm
- ❖ 3dbi圆极化天线
- ❖ 远距离读卡(>15米)
- ❖ 多标签读取(>300张)
- ❖ 支持6C&6B协议
- ❖ 支持各国UHF频段
- ❖ 红外激光抄表
- ❖ 激光功能一键抄表
- ❖ 通用各手机平板
- ❖ 多种功能组合
- ❖ 扫描引擎按需选择
- ❖ 多状态指示
- ❖ 符合国网接口标准
- ❖ 多重智能和安全管理
- ❖ 双电池续航
- ❖ 带手柄金属机身设计
- ❖ 支持RS485通讯
- ❖ IOTE金奖创新产品

适用范围:

- ❖ 电力实物ID读取、电力抄表、服装盘点、烟草行业、资产管理、快递仓储、门店盘点、生产管理、安全物资盘点等

TONGXIANG YONGCHENG CABLE CO., LTD.

(Booth No:3K16)

COPPER STRAND

The bare copper cable which is drawn and annealed with oxygen-free copper rod .and then hanged is mainly divided into hard copper strand TJ, soft copper strand TJR,. Tin-plated copper strand is formed by wire drawing annealing of oxygen-freecopper rod and close combination of tin with copper layer by advanced tin platingprocess, and then twisted into cable by polishing and oxidation resistance process.Tinned copper strand has the advantages of weldability and oxidation resistance. Thereare mainly tinned copper strand TJX and soft copper strand TJRX.. Copper strand and tinned copper strand are mainly used in power transmission conductor, connecting wire conductor and grounding grid conductor. All properties are in accordance with national standards and EU electrician standards.

JIANGXI ZHIYUAN FIRE TECHNOLOGY CO.,LTD *

(Booth No:3K74)

AEROSOL FIRE SUPPRESSION SYSTEM

ZHIYUAN electrical units for fixed systems are electrically operated. They range in size from units containing 30 grams (covering up to 0.3 m3) up to 3000 grams (covering up to 30 m3). These units are typically tied to a conventional fire detection system and a releasing panel. ZHIYUAN is an advanced technology offering peerless firefighting on a weight basis over gas or dry chemical agent. Our product line also offers a choice of operation, thermal, or electrically operated using popular detection and control systems.

WIRE AUTOMATIC INTELLIGENT HARNESS LINE

Optional innovative crimping module, the same station does not need to replace the vibration disk to achieve the same type of multi-standard terminal crimping. The terminal uses a robot to automatically select different terminals, automatic materials feeding according to the order of the terminals in the table file. The same terminal machine can be used with multiple sets of vibration disk, or match different crimping station for changing terminals quickly. The servo terminal crimping station automatically adjust the crimping force according to the size of the wire, improving production efficiency greatly. Advanced production self-testing function, realize self-detection of missing line, self-detection of missing number tube, self-detection of overload of wire-feeding motor. And can be selected terminal crimping pressure management device, terminal visual inspection system, etc, easily operation, guaranteed quality.

WUHAN NANR ELECTRIC CO., LTD

(Booth No:1T43)

HIGH VOLTAGE DIVDER

The FRC series high voltage divider is a high-voltage measuring device using potential shielding, which is mainly used for AC and DC high voltage measurement. It is the fourth-generation patented product developed by our company (patent number: ZL2012 2 0355014.1). Compared with similar products of other companies, our company uses imported dry filling materials and a variety of patented shielding technologies to make the product have a longer use Longevity and higher stability. Customers can choose different products according to different voltage accuracy requirements. The highest accuracy of this series of products is: AC: 0.5%/DC: 0.5%. If you need higher accuracy, such as 0.05%, 0.1%, you can choose our company's NRPD series DC Standard voltage divider or NRPA series AC standard voltage divider.

HIGH VOLTAGE INC.

(Booth No:2C08)

DC HIPOT TEST SETS, AC HIPOT, VLF WITHSTAND -VLF-TD, VLF-PD, CABLE FAULT LOCATORS, OIL DIELECTRIC TESTING

High Voltage, Inc. is the worldwide standard for excellence for the design and manufacture of high voltage test equipment and for its total dedication to customer care in all matters. High Voltage, Inc. specializes in the design and manufacture of high voltage test equipment used worldwide by utilities, testing service companies, electrical contractors, large industrials, and electrical apparatus OEMs. HVI produces the most technically advanced, most portable, and easiest to use products for high voltage proof, diagnostic evaluation, and preventive maintenance testing of electrical substation apparatus, aerial lifts, power cable, and other products designed to operate under medium or high voltage conditions. HVI manufactures products including DC Hipot test sets, AC Hipot, VLF withstand -VLF-TD, VLF-PD, cable fault locators, oil dielectric testing, etc. Acerta Shanghai Co., Ltd is the Liaison Office & exclusive distributor of HVI in China mainland from 2015.

CHANGSHU SWITCHGEAR MANUFACTURING CO., LTD.(FORMER CHANGSHU SWITCHGEAR PLANT)

(Booth No:1E21)

CW6 SERIES INTELLIGENT UNIVERSAL CIRCUIT BREAKER

High performance, miniaturization, digitalization, Ubiquitously interconnected smart products. It has completely independent intellectual property rights and has applied for 91 patents. The product series are complete, high performance, high measurement accuracy, to achieve simplified energy efficiency management, innovative health management, edge computing, and also meet the requirements of the ubiquitous Internet of Things, realize local and remote intelligent interconnection, and many innovative functions lead the industry to enter the new era.

ZHEJIANG ZHONGAO ELECTIRC CO.,LTD.

(Booth No:2F01)

LOW-VOLTAGE CONTROL AND AUTOMATION PRODUCT

Our low-voltage control and automation series products can provide you with motor direct start, reversible start and star delta start protection scheme. It is suitable for controlling all kinds of three-phase asynchronous motors. During the operation of construction machinery, some low-voltage components such as AON series MCB, AC contactors and AOV series motor circuit breaker can be used together. MCCB and MCB are used for open circuit and overload protection of main circuit. AC Contactor and thermal relay are used to control and protect the safe operation of motor, while transformer is used to provide voltage stability for secondary circuit.

NINGBO JINTIAN COPPER (GROUP) CO.,LTD. (Booth No:1F11)	
COPPER STRIPS	
<p>The company's main products include high-precision tin phosphor bronze strips, pure copper strips, brass strips and nickel silver strips. The products are in line with EU ROHS directive requirements. The products are widely used in electronics, power generation, communications, mechanical hardware, construction and home appliance industries. The products are sold in all provinces and cities in China and are exported to South Korea, Japan, Hong Kong, Southeast Asia and other countries and regions. The company has established good cooperative relationships with many well-known enterprises such as Bull Group, Midea Group and Oppl Lighting.</p>	

IMEGA ELECTRIC CO., LTD (Booth No:3L07)	
EV9 SERIES INTELLIGENT IOT CIRCUIT BREAKER	
<p>Ev9 series intelligent Internet of things circuit breaker is small in size and powerful in function. The width of single pole product is only 18mm, the rated current is 63A, the breaking capacity is 10kA, and the mechanical life is more than 20000 times. It has the function of remote control and electric parameter measurement, the accuracy is up to level 1, and a variety of communication modes can be selected.</p>

FUJIAN QUANYUAN ELECTRIC EQUIPMENT CO.,LTD.

(Booth No:1K61)

BUTT-FUSION-TYPE MOLDED STRAIGHT JOINT

The cable structure restoration technology is adopted in butt-fusion-type molded straight joint, we use equal diameter molecular welding technology in conductor, and the same materials as cable body are used for each functional layers, the functions of each layer of cable are restored layer by layer by melting technology, and a section of "regenerated cable" is fabricated on site to make structure and electrical properties consistent with the original cable body, which fundamentally solve the problem of active interface generated by traditional technologies such as cold shrinkage when "simulating and restoring" the cable structure. The change rate of DC resistance ratio of conductor before and after welding is close to zero and can withstand repeated high current surge. This product solves the technical defects of the traditional cable joint, such as conductor heating, moisture absorption and water inflow, uneven electric field distribution and so on, so it is more safe and reliable.

SHANGHAI ROVAL ZINC RICH PAINT CORPORATION

(Booth No:2S08)

ROVAL COLD GALVANIZING COMPOUND/ZINC RICH PAINT/ANTI-RUST PAINT/ANTI-CORROSION PAINT

ROVAL Cold Galvanizing Compound contains 96% pure zinc powder in its dry film. It has equivalent anti-corrosion performance to hot-dip galvanizing. As its prepackaged in single packs, it doesn't require mixing, or the additional use of a primer or top coat. It's easy to use and can be applied directly to steel and galvanized surfaces.

SHENZHEN HI-NET TECHNOLOGY CO.,LTD

(Booth No:3J09)

SWITCH

Shenzhen Haina Times Electronics Co., LTD., founded in 2010 in Hong Kong, is a high-tech enterprise that began with network switches. After 10 years of rapid development, the product line of the Hainer era now includes: Power over Ethernet products, industrial grade network products, commercial switch products, power products and HDMI to Ethernet fiber products and so on. As a professional network products company, we are committed to providing the best network equipment to customers around the world. Shenzhen Haina Times Electronics Co., Ltd. adheres to the core concept of "science and technology connect the future, service create value", and provides customers with high-quality products and good service in OEM and ODM. At present, we have obtained ISO9001:2015 quality system certification and China High-tech enterprise certification. At the same time, most of our products have passed "CE", "FCC", "RoHS", and some of them have also obtained UL, GS, KC,PSE, EAC, NOM, CCC, CUL and other certifications. So far, we have obtained more than 20 patents in outdoor PoE solutions. We invest 15% of our annual sales in research and development each year, ensuring that the company launches more than five new products per quarter based on market demand.

SHANGHAI LANRUI ELECTRIC CO., LTD

(Booth No:3G32)

POWER QUALITY COMPREHENSIVE TREATMENT DEVICE

The comprehensive power quality control device includes active power filter, static reactive power generator, three-phase current imbalance adjustment device, and has 2-50 odd harmonic control, inductive reactive power compensation, capacitive reactive power compensation, current imbalance adjustment and other functions. It realizes the integration of multiple functions. Aiming at the comprehensive treatment of on-site problems, it realizes the online monitoring and control of power quality, effectively reduces the harmonic distortion rate The increase of power factor and the decrease of N-line current.

WATERPROOF CONNECTOR

JINH electric co., Ltd was founded in 1997 and specialized in the manufacturing of Terminal Block , Waterproof Connector and Industrial Socket, moreover, thousand kinds of electrical accessories. JINH products are widely used in lighting, building and electric power system. Jinghong CNP waterproof connectors are independently developed by our company. We have two type, screw connection type and plug in connection type. The plug-in design is more convenient and quicker. The product is suitable for 0.5-2.5MM² cable, and the waterproof level reaches IP68. It can be used in wire connections within ten meters under water and in humid environments that can ensure good conductivity and waterproofness. Make the wiring process more convenient, faster and safer.

STATION TRANSFORMER, DRY TYPE TRANSFORMER, ISOLATION TRANSFORMER

The transformer has the advantages of small volume, compact structure, reasonable and beautiful appearance, energy saving and environmental protection; Low loss, low temperature rise, low noise, small amount of partial discharge, good thermal stability, anti overload ability, high reliability, no pollution, maintenance free and other excellent performance, is the ideal matching original parts of miniaturized transformer products.

GUANGDONG EAGLOTEST TECHNOLOGY CO.,LTD

(Booth No:1S71)

REMOTE WIRELESS KILOVOLT METER

The S310B Remote Wireless Kilovoltmeter is designed for measuring voltage or conduct voltage tests (inductance tester) for both low-voltage or high voltage cables in environments where it is hard to reach. The instrument makes measurement by detecting the electric field; for cables below 65kV, using the contact method of the instrument, regardless if it is a neutral wire, live wire, ground wire, high-voltage transmission line, a metal conductor, or just some current leakage caused by some insulation damage, as long as there is an electric field, this instrument can detect the signal. Once the transmitter detects the electromagnetic field, it will emit a "beep-beep-beep-" buzzer sound. For cables above 65kV, although it cannot be used to measure the voltage, it can be used as an inductance tester to detect live wires and voltage.

(Booth No:4J25)

AIR VENT PLUG

Waterproof and breathable products are a breathable solution that integrates pressure balancing, battery hydrogen permeability, and sound transmission. They can economically and effectively solve problems such as water vapor condensation, pressure changes, and exposure to harsh environmental influences during equipment use. Waterproof and breathable products effectively block dust and dirt for equipment, while also ensuring that the equipment maintains good breathability under constantly changing environmental conditions, thereby avoiding pressure rise caused by gas accumulation inside the equipment, causing damage to the sealing strip of the shell and the invasion of sensitive electronic components by water and dust.

SHANGHAI TANSHI AUTOMATION EQUIPMENT CO.LTD

(Booth No:3K04)

NETWORK CABINETS

Made of cold-rolled steel plate, bearing up to 1000kg, the appearance of high adhesion electrostatic powder spraying, impact resistance, not easy to corrosion, the front door glass using 5mm tempered glass, strong and durable, with wind pressure resistance, heat resistance, impact. Network cabinet is used to combine the panel, plug-in, plug-in box, electronic components and other equipment components installed in the computer, can make it a whole installation box.

Exhibitors/Product Introductions

XI'AN PHILINK ELECTRIC CO.,**(Booth No:1T45)****SWITCH CABINET CONTROL DEVICE AND INTELLIGENT DEHUMIDIFICATION DEVICE**

Switch cabinet control device is suitable for 3-35kV indoor middle cabinet, hand cabinet, ring network cabinet and other switch cabinets. With a simulation diagram, electric display, separate brake state indication, grounding switch indication, energy storage indication, hand car position indication, voice error warning, temperature and humidity control, RS485 communication and other functions. Intelligent dehumidification device is the use of semiconductor refrigeration dehumidification way, the moist air in the confined space under the action of the fan is inhaled dehumidification duct, the water vapor in the air is condensed into water after the semiconductor refrigeration mechanism, and then discharged through the aqueduct cabinet, can achieve good dehumidification effect.

YANGZHOU SENYUAN POWER TECHNOLOGY CO., LTD.

(Booth No:5G52)

SHIELDED DETACHABLE CABLE CONNECTOR

Shielded detachable cable connector, multi-layer composite, injection molding process production, product structure and size composite DIN47636/en 50181 standard, product surface can be charged touch and flood immersion, reliable and safe performance.

ROTAREX FIRETEC

(Booth No:2J05)

FIREDETEC ELECTRICAL CABINET PROTECTION SYSTEM

The Rotarex FireDETEC® system uses a patented continuous linear FireDetec tube that uses pneumatic technology to reliably detect and control the release of extinguishing agents. Compared with mechanical or electronic systems, it is more flexible, more space efficient, and has a higher cost performance. The flexible FireDetec tube can be directly installed inside the electrical cabinet, on the wires and circuits that may cause a fire. The pre-charged 16bar nitrogen makes the FireDetec tube more sensitive to flames. The instantaneous loss of pressure will activate the valve and immediately spray the extinguishing agent to eliminate the fire in its budding state, minimizing damage and downtime.

SHENZHEN ABSEN OPTOELECTRONIC CO.,LTD.

(Booth No:3A06)

CLEAR COBALT SERIES

Clear Cobalt Series Inspiring color Redefined reality

Product features: *Black coating technology *Support HDR10 *Wide color gamut * Full flip chip technology

*High reliability Black Coating Technology:With full black coating technology and Absen's black calibration technology, the Clear Cobalt has not only gained a non-reflective surface, but also produces vivid colors for true to nature images. Stunning Visual:Clear Cobalt utilizes Absen's custom HDR image algorithm technology, to render optimum peak brightness and contrast for every frame image, to display true-to-life imagery High Reliability: Use the full flip chip and chip on board technology , the product has high reliability. Easy Installation:Transform spaces with the latest trend in LED displays and allow customers to have luxury experience. The Clear Cobalt, a monumental screen with optional edges and wall-mounted frames, provides an ultra-high quality installation which submerges into the surrounding environment.

XIAMEN VACTEC EQUIPMENT CO., LTD.

(Booth No:2L03)

XIAMEN VACTEC EQUIPMENT CO., LTD.

Xiamen Vactec Equipment Co., Ltd. focus on the production of various types of epoxy resin vacuum mixing and casting equipment , ancillary services. It is widely used in MV/HV switchgear insulators, HV cable joint accessories, dry-type transformers, Insulating bushings, insulating rods, reactors, CT/PTs, motors, dry capacitors, MRI coils、 Wind power blades, car ignition coils, etc. The company has more than 10 years' experience on the equipment designing, manufacturing and service. Company has many patents, such as online vacuum degassing continuous mixing, servo metering pump synchronization monitoring, APG synchronous precision injection, continuous casting flexible production line, intelligent Digital management system, etc. The equipments are designed accordant to German industrial standard, and made with newest and advanced technology, high quality components are imported from Europe or Japan. There are many sets of high quality equipments exported to Korea, Japan, Turkey, Vietnam, India, Malaysia, Taiwan etc. The company is located in the northern industrial zone of Jimei, Xiamen, about 15 km from the airport, about 5 km from the high-speed railway station or high-speed port, convenient transportation and supporting services.

TESTO 883 - THERMAL IMAGER (320 X 240 PIXELS, MANUAL FOCUS, APP, 2 LENSES SELECTABLE)

The testo 883 thermal imager is a reliable partner when carrying out your thermal measuring tasks. Its outstanding thermal image quality and useful features will enable you to save time and ensure perfect work results. (1) Measuring range: -30 to +650°C; (2) Accuracy: $\pm 2^{\circ}\text{C}$, $\pm 2\%$ of m.v. (greater value applies); (3) IR resolution of 320 x 240 pixels (with SuperResolution 640 x 480 pixels); (4) Useful features: testo SiteRecognition intelligent image management and testo Thermography APP; (5) Extensive analysis and documentation: With the intuitive professional software testo IRTSoft; (6) Full control: Manual focus and interchangeable lenses

ZHEJIANG LIRONG ELECTRIC GROUP CO., LTD

(Booth No:4T31)

HIGH VOLTAGE ZINC OXIDE LIGHTNING ARRESTER

Zinc oxide lightning arrester is a lightning arrester with good protective performance. Utilizing the excellent nonlinear volt-ampere characteristics of zinc oxide, the current flowing through the lightning arrester at normal operating voltage is extremely small (microampere or milliamper level); When overvoltage occurs, the resistance drops sharply, releasing the energy of overvoltage to achieve protection. The difference between this type of lightning arrester and traditional lightning arresters is that it does not have a discharge gap and utilizes the nonlinear characteristics of zinc oxide to discharge and break.

AVC-DVR DYNAMIC VOLTAGE REGULATOR

The AVC-DVR Dynamic Voltage Regulator is an
advanced power conditioning device designed to
quickly stabilize voltage output. It combines the
advantages of dynamic voltage regulation technology
and thyristor-controlled non-contact regulators to
achieve fast response, high accuracy and reliability of
voltage regulation. The AVC-DVR Dynamic Voltage
Regulator uses an advanced feedback control
algorithm that detects voltage changes in milliseconds
and makes real-time adjustments to stabilize the
output voltage. Compared with traditional voltage
regulators, it has higher voltage stabilization speed
and lower voltage stabilization error, and can better
adapt to power load changes and grid fluctuations

INSULATING BOARD

Epoxy resin board, also known as insulation board, epoxy board, or 3240 epoxy board. Epoxy resin refers to organic polymer compounds with two or more epoxy groups in their molecules, and their relative molecular weight is not high, except for a few. The molecular structure of epoxy resin is characterized by the active epoxy group in the molecular chain. The epoxy group can be located at the end, middle or in a ring structure of the molecular chain. Because the molecular structure contains active epoxy groups, they can cross link with various types of curing agents to form insoluble, non fusible polymers with three-dimensional network structure.

HUNAN XIANGBO ELECTRIC CO.,LTD

(Booth No:4S01A)

SWITCHGEAR TEST TERMINAL

I. Product Description: Switch cabinet test terminal, suitable for 10kV ~ 35kV grade bushing, is mainly used for the installation of switchgear test terminal and casing to achieve the overall voltage resistance performance detection of the inflatable ring network cabinet or box variable and to achieve the synchronized detection to transformer (switch cabinet), cable and cable accessories, installation-easy, safe and reliable. The product interface conforms to the standard EN50181&EN50180 in various types of bushings (A, B, C, D, E, F). II. Product Features: As a product being fully insulated, sealed and shielded, the pressing device ensures the its reliability. Compared with other configurations, the structure size is more compact, power frequency withstand voltage performance: 42kV/60S, 72kV/60S, 117kV/60S. Product Model: SYZD-10/250 SYZD-15/600 SYZD-10/630 SYZD-35/800E SYZD-24/630 SYZD-35/800 SYZD-35/800C SYZD-35/800F

HEBEI CHAODA SEAL PRODUCTS CO., LTD.

(Booth No:5G53)

SUPER STRONG RUBBERIZED WATERPROOF TAPE

Product Description Chaoda Strong Rubberized Waterproof Tape is a super strong, rubberized, waterproof tape that can patch, bond, seal and repair virtually everything. Strong Rubberized Waterproof Tape is specially formulated with a thick, flexible, rubberized backing that conforms to any shape or object. Strong Rubberized Waterproof Tape can be applied hot or cold, wet or dry, even underwater. Strong Rubberized Waterproof Tape instantly seals out water, air and moisture to create a super strong, flexible, watertight barrier. Strong Rubberized Waterproof Tape is extra wide to quickly cover large cracks, gaps and holes. Strong Rubberized Waterproof Tape is UV resistant, environmentally friendly, VOC-free and has a wide temperature range so it can be used in extreme weather conditions. PATCH large holes, cracks, gaps and tears. BOND together almost any objects. SEAL out water, air and moisture. REPAIR virtually everything.

(Booth No:4L47)

SCAPA

Scapa has provided cable wrapping tapes to the industry for over 100 years and is a market leader in the cable components field. Our putties, resins, tapes and impregnated papers are used across the world for the splicing, termination and repair of LV and MV power cables as well as many other telecommunication applications. Many of our products have been developed in partnership with key market leaders, and our solutions offer reliability, ease of use and long term protection for a broad range of installations and repairs. Customers all over the world choose Scapa components and tapes to be included in their splicing kits because they are uniquely developed to suit any field application. Established global partnerships at Top 5 Primary applications: Medium / High Voltage, Submarine, Umbilical, Fibre Optic, Fire Survival Applied at high speeds under tension with no breakage

IMPROVED GCK SWITCHGEAR AND IMPROVED GCS SWITCHGEAR

Improved GCK Switchgear Features of hand pull mechanism: Beautiful design, easy installation and affordable, the unit height of the drawer in this type can be 150mm, 160mm, 200mm, 300mm, 400mm, 600mm, which can be 24 loops at most. Improved GCS Switchgear Features of CXJG-8 hand cranked mechanism: With dual turbo structure, it is made of high strength wear-resistant plastic. It is adaptable for a high-current large drawer unit with large operating torque, and it is easy and flexible to use by multi-lap labor-saving hand cranking, smooth in cranking in and drawing out the drawer. Made of a strong thick steel plate, It is also reliable to make a strong thick steel plate in operation.

VACUUM PRESSURE IMPREGNATION EQUIPMENT

Vacuum pressure impregnation equipment is mainly used for insulation treatment of electrical products. For example, high-voltage motors, traction motors, wind turbines, water conservancy generators, explosion-proof motors, coal mine specialized transformers, H-grade insulated dry-type transformers, power capacitors, and insulation material impregnation of cables. Products such as motors or transformer coils can be dehydrated and degassed during the vacuum stage by vacuum pressure impregnation, reducing the impact of impurities such as water and gas on insulation; During the pressure impregnation stage, the insulation paint can penetrate deeply into the interior of the insulation structure under pressure, strengthening the overall insulation, thereby improving the insulation level and improving the electrical performance of the product.

WENZHOU WISCON INDUSTRY CO., LTD

(Booth No:5G56)

LOW-VOLTAGE POWER CAPACITOR

Efficiency: Improve power factor, reduce energy loss, and minimize energy waste. Stability: Capacitance decay rate of less than 1% per year, design lifespan exceeding 100,000 hours, providing long-lasting power compensation effects. Energy-saving and material-reducing: Single-unit design with large capacity, reducing the number of devices and installation space required, reducing investment costs.

GUANGDONG YEXING TECHNOLOGY CO., LTD.

(Booth No:4C11)

PCS (POWER CONVERSION SYSTEM)

PCS and their optional accessories are the link between the power grid and energy storage devices. It realizes the mutual conversion of AC and DC energy, and monitors the voltage, current, and power temperature data of the AC and DC terminals of the energy storage converter. Shouldering the role of charging and energy feedback, it is one of the key equipment in the energy storage system, providing a prerequisite for the strong development of renewable energy supporting energy storage and independent/shared energy storage power stations. At the same time, PCS can also serve as a controllable energy storage power source in the microgrid, solving the contradiction between the large grid and distributed power sources. This enables the microgrid to operate in conjunction with the large grid, or to operate separately when the grid malfunctions or needs to be disconnected from the main grid, greatly improving the safety, stability, and economy of the power system.

Exhibitors/Product Introductions

SHANDONG RUITAI GLASS INSULATOR CO., LTDD

(Booth No:4F34)

GLASS INSULATOR

Shandong Ruitai Glass Insulator Co., Ltd founded in 2006 and specializes in manufacturing toughened glass insulator for high voltage and ultra high voltage electric transmission power line, high voltage glass support insulator for transmission power station, and DC glass insulator for electrified railway, etc Our cap and pin type suspension glass insulator, high voltage glass support insulator, DC glass insulator are the key items of The National 8th Five Year Plan. Their insulation and safety have achieved the worlds advanced level. The grade of high voltage transmission line ranges from 10 to 1100KV. Their specifications range from 40 to 840KN. There are AC type, DC type, standard type and antipollution type. It is an ideal choice for the construction of transmission power line in our country and updating your products. Our suspension glass insulator, high voltage glass support insulator, DC glass insulator have the following advantages: fatigue-resistant property, lightning resistant

ZHEJIANG ZHENGXING ELECTRICAL CO., LTD.

(Booth No:4L09)

35KV INDOOR VACUUM CIRCUIT BREAKER (HANDCART TYPE)

Model ZN85-40.5 handcart type indoor high voltage vacuum circuit breaker, suitable for three-phase AC 50Hz, rated voltage 40.5 kv power system, for industrial and mining enterprises, power plants and substations as divided load current, overload current. The use of fault current.

JIEYUAN ENERGY STORAGE TECHNOLOGY (SHANDONG) CO., LTD

(Booth No:4J17)

YBW-SERIES HIGH-VOLTAGE/LOW-VOLTAGE PREINSTALLED SUBSTATIONS

Characteristics of the new prefabricated substation:
The shell is electrostatically sprayed for aesthetics;
Small appearance and volume; The external
transformer can be replaced separately, with good
heat dissipation; Removable transportation; Large
scalability, which can increase installation space;
The heat of the transformer is isolated from the
components inside the distribution cabinet, Reduce
high-temperature aging of components.

SHENZHEN CHAZHI TECHNOLOGY CO., LTD.

(Booth No:4J05)

THERMAL OVERLOAD DETECTOR

The thermal overload detector is a series of products independently developed and produced by Shenzhen Chazhi Technology Co., Ltd., with independent patents and intellectual property rights. A very early safety detection device that can collect air samples through an air sampling tube and analyze the concentration of thermally released ions in the air samples. It can provide alarms based on the set value. It can detect thermal overload 180 to 9000 seconds in advance and issue an alarm, without false alarms for non combustible particles, and dust and haze will not affect the detection effect. We have bought valuable time for investigating material thermal overload, especially electrical thermal overload.

HEFEI DESHENG ELECTRIC APPLIANCE CO., LTD

(Booth No:5N28)

RDSAPF ACTIVE POWER FILTER DEVICE

The RDSAPF active power filter device developed and produced by our company adopts the fifth-generation Infineon IGBT and Xilinx FPGA chip, real-time data acquisition technology and dynamic real-time tracking compensation method to eliminate harmonics in the power grid, and realizes the effective filtering of 2-50 harmonics. The instantaneous compensation time is less than 50us, and the full corresponding time is less than 5ms. Life is greater than 100,000 hours, noise is less than 65 dB, excellent thermal stability, is an excellent performance of the power filter.

SHENYANG LONGDY ELECTRICAL EQUIPMENT CO., LTD

(Booth No:4L01)

HIGH VOLTAGE, MEDIUM VOLTAGE, - AUXILIARY SWITCH

Our auxiliary switch series is configured in high-voltage or medium-voltage circuit breakers, isolating switches and other electrical equipment. It is small and exquisite, flexible in angle control, special on-off switch, meets the high-current demand of the high-voltage switch industry, and has a significantly longer service life. , Reliable performance, wider application space. Our FA, FK.FB products have been widely used in high-voltage customers at home and abroad. They are suitable for controlling the closing, opening, interlocking, and signal circuits of various high-voltage switch operating mechanisms, and can also be used as transfer or combination switches.

ZHEJIANG PUTAI HIGH VOLTAGE ELECTRICITY CO., LTD.

(Booth No:4K15)

SOLID SEALING POLE

The vacuum interrupter and the conductive parts related to the circuit breaker are embedded in the solid insulating material such as epoxy resin, which is easy to cure, to form the pole, so that the whole pole of the circuit breaker becomes an integral part.

SUZHOU LECANG PRECISION TECHNOLOGY CO.

(Booth No:4S25)

PVDF

Polyvinylidene fluoride (PVDF) is a highly crystalline fluorinated compound known for its excellent toughness, outstanding corrosion resistance, high hardness, and remarkable stability. Even at temperatures reaching 300 degrees Fahrenheit, it can withstand strong chemical corrosion. This product meets UL94V-0 flammability standards, boasts exceptional purity, and has become the ideal material for industries such as semiconductor manufacturing equipment processing. PVDF exhibits remarkable toughness and maintains stable electronic properties even under variable frequency and high-temperature conditions, making it suitable for the manufacturing of electrical transmission components. This product comes in two specifications, both of which have simple production processes and a variety of shapes, including pipes, rods, and discs.

XIYA ELECTRIC EQUIPMENT CO.,LTD.

(Booth No:4S03)

DROP OUT FUSE

It mainly manufacture power transmission line equipment from 11kv to 220kv, covering many product series as Fuse cutout, Surge arrester, Composite insulator, vacuum circuit breaker, Wallbushing, Disconnecting switch & Air break switch Onload, hardware fitting of overhead line and Heat & coldshrinkable power cable accessories electric components and whole set cabinet.

Exhibitors/Product Introductions

ZHEJIANG ZIGUANG ELECTRICAL EQUIPMENT CO., LTD.

(Booth No:3E25)

ZW7-40.5 OUTDOOR HIGH-VOLTAGE VACUUM CIRCUIT-BREAKER

This circuit breaker adopts porcelain pole structure, spring operation device and it can undertake tasks like opening operation and closing operation nearby or remotely. It also has the advantages such as excellent interruption performance, short arcing time, long electrical endurance, simple structure and convenience to be installed and maintained. Moreover, it can be used to open or close load current, overload current and short-circuit current. It was applicable at transformer substations, power plants, rural power distribution automation grids and occasions where frequent operations are needed.

ZHEJIANG QITE ELECTRIC CO., LTD

(Booth No:4G03)

SF6V(C)-12KV/SERIES INFLATABLE CABINET SWITCH/MECHANISM

The SF6-V(C)-12KV/630A series is designed for indoor AC high-voltage gas-insulated metal-enclosed switchgear equipment (referred to as "SF6 inflatable cabinet"). The switch utilizes a spring-operated mechanism in conjunction with a vacuum tube for arc extinguishing or a load switch for arc extinguishing, combined with an insulated compartment using sulfur hexafluoride gas. This design is both compact and expandable, making it suitable for distribution automation. The inflatable cabinet features a compact structure, flexible operation, and reliable interlocking, providing satisfactory technical solutions for various applications, especially in challenging environmental conditions and meeting diverse user requirements.
